

TreeRing

yearbooks for the internet generation

TreeRing has created a new approach to the yearbook by eliminating financial costs for schools and giving parents and students more of what they want – pictures of their memories.

Social and Personalized Yearbooks

TreeRing gives schools a safe and private online platform, exclusive to its parents and students, to share photos, memories, signatures and bling that will be uniquely printed in their copy of the yearbook.

No Cost for Schools

Zero, zilch, nada. That's right, no costs for schools. At TreeRing we only print what parents order, so schools are never left with the tab.

4 Week Turn Around

At TreeRing we believe that March, April and May have feelings, too. That's why we have a lightening fast 4 week turn around, so schools can include spring events in the yearbook.

Good for the Environment

TreeRing's environmental roots go deeper than our name. We kinda like this planet, so we plant a tree for every yearbook purchased and print our books on recycled paper. It's the least we can do for the next generation.

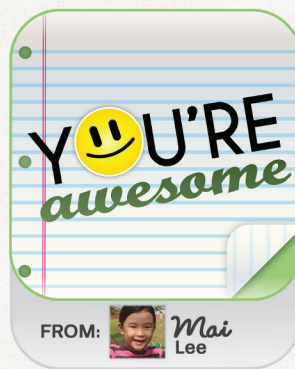

Memories

Every student can capture their very best memories with TreeRing.

Signatures

TreeRing allows students to sign each others yearbooks electronically and add a personal photo.

Bling

Students can send each other full color badges as expressions of friendship.
